

EE-100 Engineering Laboratory Module2: CAD

Dr. –Ing. Ahmad Kamal Nasir

Office Hours: Room 9-345A

Monday (1000-1100)

Wednesday (1500-1600)

CAD Module

Learning Objective 1: Create and interpret mechanical drawings

Learning Objective 2: Recall and demonstrate workshop/industrial safety practices.

- Week 1
 - Introduction to the course and its contents
 - Design methodology for scientists and engineers
 - Introduction to Engineering Drawing
 - Engineering Drawings
 - Standards, Types, Projections
 - Workshop / Industrial Safety Practices
 - **Lab Tasks:** Sketch orthographic projections of solid objects
 - **Lab Visit:** Overview of workshop facilities
- Week 2
 - Computer Aided Modeling
 - Intro to PTC Creo and its features
 - 2D sketching
 - Basics of 3D object modeling
 - **Lab Tasks:** 3D part modeling.
- Week 3
 - Advanced features of PTC Creo Parametric 2.0:
 - Lab Tasks: 3D part modeling
- Week 4
 - Assembly
 - **Lab Task:** Assembly task
- **Week 5**
 - **Lab Task 9:** Create parts and assembly drawings for a robotic hand (gripper)

Problem Statement

In Engineering, **a robotic arm gripper is required** for effectively handling work in laboratory and home applications and industrial setups.

Usages:

- Pick and place
- Welding metals
- Grasping Objects
- Serving food in restaurants

Simplest Solution

A 2-finger gripper is a perfect fit as it can easily hold the tools and work pieces. Following figure shows the 3D views of the proposed gripper design

Gripper Base

Gripper Holder
