Lahore University of Management Sciences

CS678 – Topics in Internet Research

Spring 2016

Instructors	Dr. Ihsan Ayyub Qazi and Dr. Zartash Afzal Uzmi
Room No.	9-114A (Ihsan), SBASSE 9-319 (Zartash)
Office Hours	2pm-3pm, Thursday (ihsan)
Email	ihsan.qazi@lums.edu.pk, zartash@lums.edu.pk
Telephone Ext	8368 (Ihsan) & 8202 (Zartash)
Class Timings	5pm-6:15pm, Tuesday/Thursday
Class Venue	A14, Academic Block
Course URL	http://lms.lums.edu.pk

Course Basics				
Credit Hours	3 credit hours			
Lecture(s)	2 per week		Duration	75 minutes per lecture

Course Distribution	
Core	None
Elective	All
Open for Student Category	All
Close for Student Category	All

COURSE DESCRIPTION

CS678 is a graduate-level course on computer networking research. The course involves lectures, paper reading, discussions, and a semester-long research project. CS678 will focus on six key areas in networking research namely, '*Network Architectures and Principles*', '*Cloud Computing and Datacenter Networking*', '*Transports, Congestion Control, and Buffer Sizing*', '*Routers, Routing, and Censorship*', '*Wireless Networks*', and '*ICT for Developing Regions*'. For each of these areas, we will read classical research works as well as explore the state-of-the-art. Students will be required to write paper summaries and participate in class discussions. In addition, students will be expected to make presentations on assigned papers and participate in a semester-long research project.

COURSE PREREQUISITE(S)

- CS382 (Net-Centric Computing) or CS471 (Computer Networks)

COURSE OBJECTIVES

- To become familiar with the state-of-the-art in computer networking research
- To understand how to engage in networking research
- To investigate novel ideas in computer networks through a semester-long research project

Learning Outcomes

- Students will have good understanding of the principles behind state-of-the-art network protocols and architectures
- Students will have gained experience in reading research papers and critically analyzing the research of others
- Students will gain experience with carrying out an independent research project

Grading Breakup and Policy

- Quizzes: 10%
- Attendance and Class Participation: 10%
- Paper Summaries + Short Presentation(s): 10%
- Long Presentation(s): 5%
- Final Exam: 20%
- Project: 45%
  - Bi-weekly Progress Meetings: 15%
  - Project Proposal: 5%

- Mid Project Report: 5%
- Final Report/Presentation: 20%

Research Project

The semester-long research project is one of the most important components of this course. The goal is to carry out novel research in the area of computer networks that by the end of the semester would be publishable in a good quality workshop or a conference. Past research projects in this course have been quite successful. Here are some papers that started out as course projects:

- **Aqib Nisar, Aqsa Kashaf, Zartash Afzal Uzmi, Ihsan Ayyub Qazi, "*A Case for Marrying Censorship Measurements with Circumvention*" in ACM HotNets 2015, Philadelphia, USA, November 2015**
- **Hasnain Ali Pirzada, M. Raza Mahboob, Ihsan Ayyub Qazi, "*eSDN: Rethinking Datacenter Transports Using End-Host SDN Controllers*" in ACM SIGCOMM 2015, London, UK, August 2015 (poster paper)**
- **Ruwaifa Anwar, Kamran Nishat, Mohsin Ali, Zahaib Akhtar, Haseeb Niaz, and Ihsan Ayyub Qazi, "*Loss Differentiation: Moving onto High-Speed Wireless LANs*" in IEEE INFOCOM 2014, Toronto, Canada**
- **Aisha Mushtaq, Asad Khalid Ismail, Abdul Wasay, Bilal Mahmood, Ihsan Ayyub Qazi, and Zartash Afzal Uzmi, "*Rethinking Buffer Management in Data Center Networks*" in ACM SIGCOMM 2014, Chicago, USA August 2014 (poster paper)**
- **Syed Mohammad Irteza, Adnan Ahmed, Sana Farrukh, Babar Naveed Memon, and Ihsan Ayyub Qazi, "*On the Coexistence of Transport Protocols in Data Centers*" in IEEE ICC 2014, Sydney, Australia, June 2014**
- **Ali Munir, Ihsan Ayyub Qazi, Zartash Afzal Uzmi, Aisha Mushtaq, Saad Naveed Ismail, M. Safdar Iqbal, and Basma Khan "*Minimizing Flow Completion Times in Data Centers*" in IEEE INFOCOM 2013, Turin, Italy**
- **Zahaib Akhtar, Kamran Nishat, Haseeb Niaz, Ruwaifa Anwar, Mohsin Ali, and Ihsan Ayyub Qazi, "*BLMon: A Loss Differentiation Scheme for 802.11n*" in IEEE INFOCOM 2013, Turin, Italy (poster paper)**
- **Shahida Jabeen, Muhammad Bilal Zafar, Ihsan Ayyub Qazi, and Zartash Afzal Uzmi, "*SplitBuff: Improving the Interaction of Heterogeneous RTT Flows on the Internet*" in IEEE ICC 2013, Budapest, Hungary, June 2013**

Project Proposal

The project proposal is due on Monday, February 8th in the form of a written document (max 2 pages). Students will also be expected to deliver a 10-min presentation on the proposal on Friday, February 12th. The proposal should have answers to the following questions:

a) What is the problem you plan to address?
b) What are the most related works? (state and cite some papers)
c) What is your proposal and how does it differ from prior work?
d) Mention a timeline and a division (if there are 2 or more members in the project) of the project tasks

Paper Summaries

A short written summary (max 1/2-page) of each assigned paper will be due by 11:59pm the day before the class. The summaries will be expected to cover the following points: *main idea (no more than 2 sentences), critique, and key assumptions made in the paper*. Students will be given bonus points for answering the following two questions: (a) *an advantage of the proposed work that was not discussed in the paper*, and (b) *a suggestion for extending or building on the paper for future work*.

All paper summaries are expected to be submitted on LMS. We will be using piazza this semester for paper discussions. You can sign up for the class at the following URL: piazza.com/lums.edu.pk/spring2016/cs678

Bi-weekly Progress Meetings

The purpose of these meetings is to ensure that (a) the research projects are on track and (b) to strategize in case there are any bottlenecks in the project. Students will be expected to submit a list of milestones/tasks achieved (as bullet points) as well as a list of tasks to be carried out in the next two weeks (maximum 5 bullet points can be submitted). These need to be submitted on piazza as a private message to the instructors (select folders with names 'biweekly1', 'biweekly2', … , 'biweekly6').

Mid-Project Report

Students will be expected to submit a 1-page mid-project report on the milestones achieved, challenges faced and how you overcame them, and a list of future tasks to be carried out and a plan for the execution of the tasks.

Final Report

The final report should be structured as a conference/workshop paper and should include (a) description of the problem, (b) problem motivation, (c) your solution/idea, (d) discussion of related works, (e) evaluation of your solution, and (f) a conclusion. We strongly suggest that you write your final report using LaTeX. It is the de-facto tool in which most CS/EE research papers are written. While it has a small start-up cost, it is much easier to collaboratively write research papers using LaTeX than using Word. Here is a sample LaTex paper (http://www.cs.cmu.edu/~dga/15-744/S07/sample.tar.gz) and a MS Word template (sample file: http://www.acm.org/sigs/publications/pubform.doc) for ACM SIG proceedings).

Source Code Control

Lahore University of Management Sciences

You are required to use GitHub, version control platform for performing source code control for your project as well as for the paper/report you are writing. Please share a link of your public repository by the project proposal deadline.

Long Presentations
Students will be expected to deliver one or more long presentations (maximum 15mins, no more than 10 slides) in the course. We will assign papers to the students randomly. In some circumstances, two students may be assigned to make a joint presentation. It will be expected that the presenters will be prepared to answer any related questions.

Short Presentations
Students will be expected to present a short (oral) summary of the paper at the start of a class. Students will be chosen *randomly* for this purpose.

Class Participation (CP)
Students will be expected to participate actively in the class in the form of questions, critique of the paper, new ideas, etc. Grading of CP will also include attendance as a component.

Policies
- All deadlines are hard
- All assigned work must be done individually (unless specified otherwise)
- Re-grading can be requested within 2 days after grade reporting

Examination Detail	
Midterm Exam	Yes/No: **No**
Final Exam	Yes/No: **Yes** Duration: **3 hours**

	Session	Author(s)	Date	Lead Instructor
1	[Introduction] Course Introduction & Overview of Networking Research "*Starting a Research Project*" "*How to Read a Paper*" "*How to build research network systems in your spare time*" in ACM SIGCOMM CCR 2010	 Wilkes et al. S. Keshav R. Mahajan	19th Jan, 2016	Zartash Afzal Uzmi Ihsan Ayyub Qazi
	Network Architectures and Principles			
2	[Internet Architecture] "*The Design Philosophy of the DARPA Internet Protocols*" in ACM SIGCOMM 1988 [Optional] "*End-to-end Arguments in System Design*" in ACM Transactions on Computer Systems [Optional] "*Forty Data Communications Research Questions*" in ACM SIGCOMM CCR 2011 (*useful for research projects*)	 Clarke et al. Saltzer et al. Craig Partridge	21st Jan, 2016	Ihsan Ayyub Qazi
3	[Control Plane Architectures] [Video] "*The future of networking and the past of protocols*", talk by Scott Shenker at the Open Networking Summit, 2011 [Slides] "*Software-defined networking*", IEEE INFOCOM 2009 Keynote talk "*OpenFlow: Enabling Innovation in Campus Networks*" in ACM SIGCOMM CCR 2008 (focus on Section 2 and onwards) [Optional] "*The Road to SDN: An intellectual history of programmable networks*" in ACM Queue 2013	 Scott Shenker Nick McKeown Mckeown et al. Feamster et al.	26th Jan, 2016	Ihsan Ayyub Qazi

	[Optional] "*Onix: A Distributed Control Platform for Large-scale Production Networks*" in OSDI 2010	Koponen et al.
